We don't take GPS readings nor do we want to advertise these monitoring and sampling locations as this has caused problems with equipment interference in the past.

Thanks Chris

Looks like I have one more GIS/location request.

This time I'm interested in trying to get the MDNR air monitoring locations in our web app. I wasn't sure if this information would be with the solid waste program, hazardous waste program, federal facilities, state OSCs/emergency response, or the air program.

Any chance you could help me figure that out?

Tom

Tom:

Ryan is out of the office today on a site visit. Here is the data you requested.

Thanks, Branden

Subject: GPS/location information from the Final Vicinity Sample Report

Hey Ryan,
Just wondering if it would be possible for you to provide the GPS coordinates or appropriate locational information from the Vicinity Sampling report.
Primarily I'm interested in the soil and sediment sample locations but I would take the dust and water samples as well.
My intention is to add them to the web application for the West Lake site which I believe we have utilized on past conference calls.
Let me know if there are any additional questions or concerns,
Tom Mahler
